

# MULTI-PROTOCOL NX-3000 SERIES: BRILLIANTLY SIMPLE

#DMR

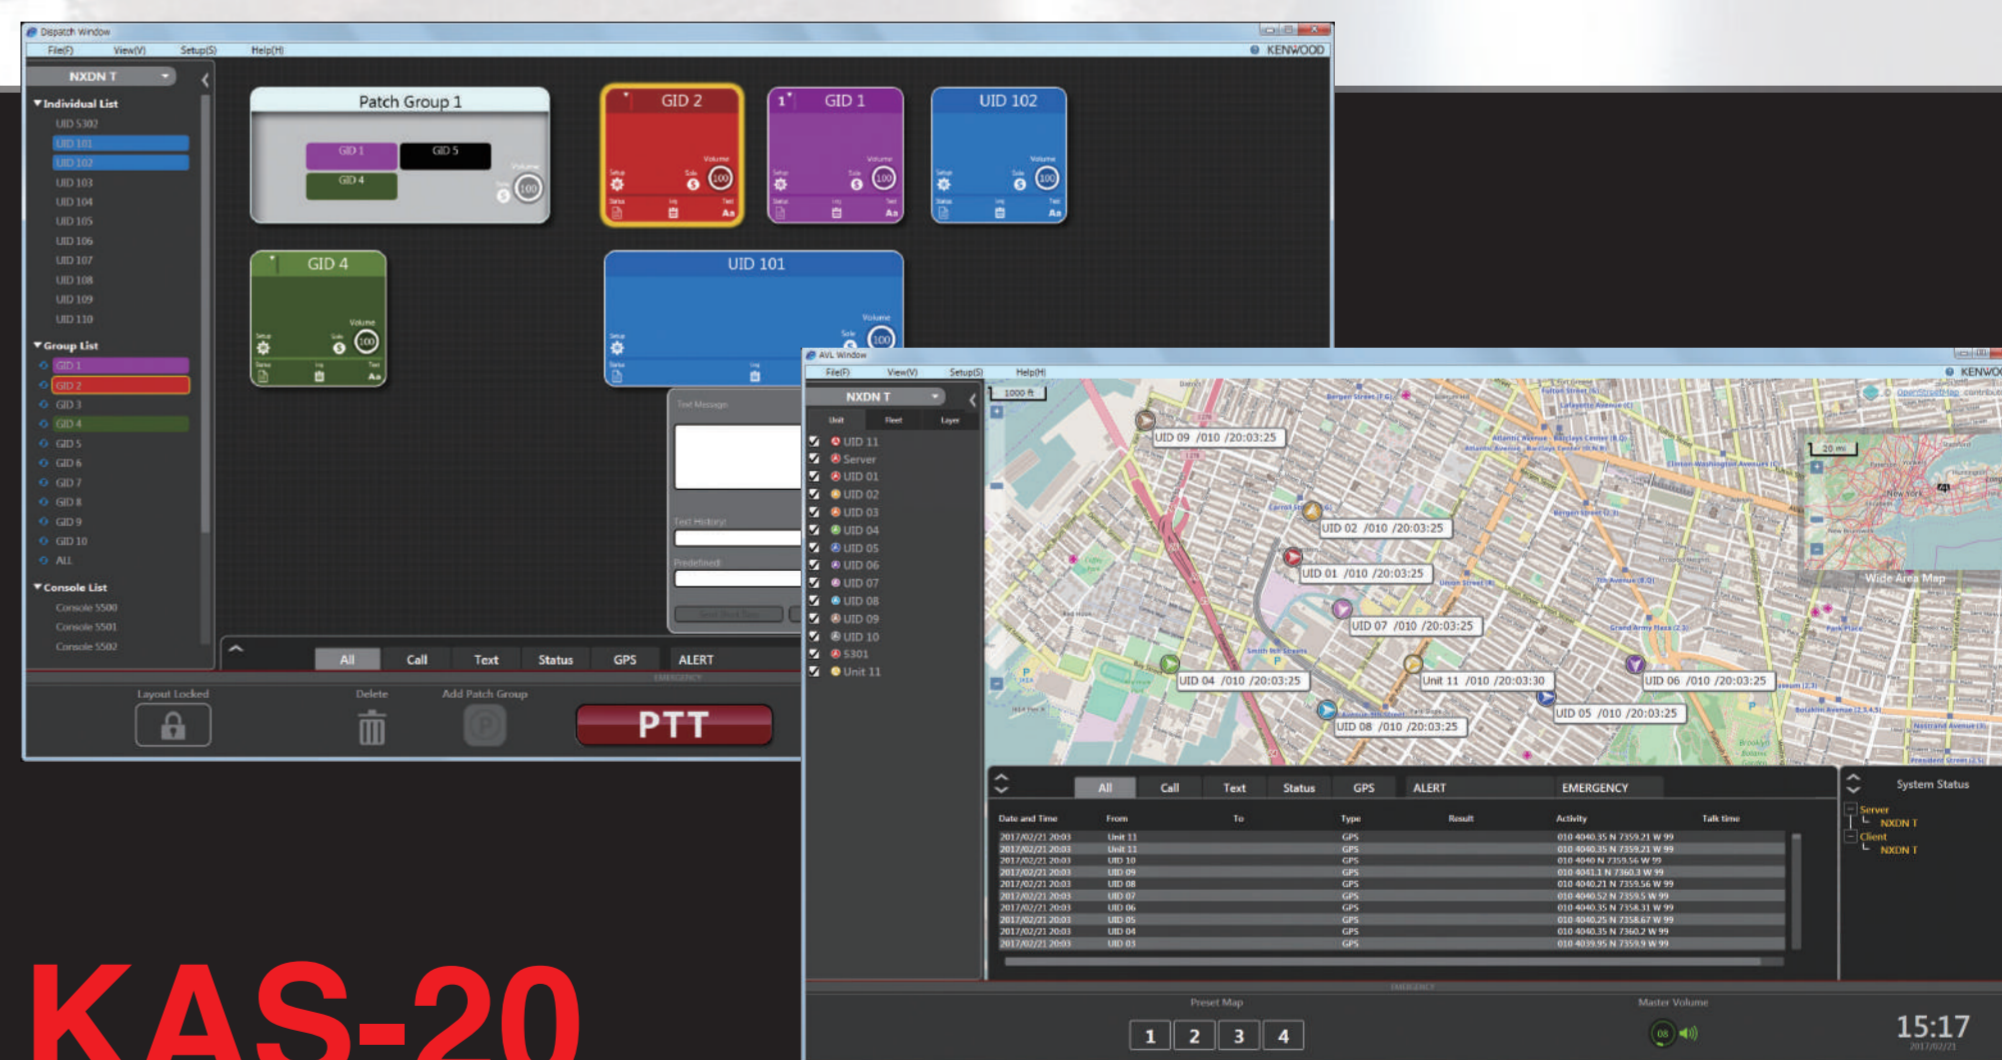

**KAS-20:**  
Simply brilliant

The new Multi-Protocol NX-3000 Series brings a wealth of advanced features that enhance worker safety, site security and operational efficiency in a compact, high-performance range of hand-portable and mobile VHF and UHF radios.

But what the NX-3000 Series also offers is the ability to choose between DMR + FM or NXDN + FM analogue operation with the unrivalled flexibility to switch from one to the other in the future as your voice and data communication needs evolve or change.

And to ensure that you can fully exploit the potential of the NX-3000 Series, simply add the new KAS-20 Suite.

**KAS-20**

**KAS-20 is our most powerful, feature-rich and scalable AVL and Dispatch solution, providing control of multiple subscriber units on the same network by employing either a local client configuration or server configuration with multiple clients for both conventional and trunked systems.**
