

ULTRALIFE®

LPAS-320-A04 (30 – 108Mhz)

The antenna is a wideband monopole whip, primarily intended for use with portable and handheld radio's in VHF frequency range from 30 to 108 MHz.

Electrically the antenna is optimized for use in conditions such as radio in hand or at the side. The antenna is composed of radiating tape and antenna matching unit with built-in passive transformer tuning network enclosed in fiberglass housing. Between the tape radiator and matching unit is a flexible goose-neck

- **Frequency:** 30-108 Mhz
- **Impedance:** 50 ohms
- **VSWR:** < 3.1:1
- **Polarization:** Vertical
- **Max. Power:** 25W CW
- **Connector Type:** TNC (male)
- **Radiator Type:** Tape
- **Height:** 44.8 inches (1140 mm)
- **Weight:** 9.8 ounces (280 grams)
