## BLUETOOTH ID BADGE

ID CARD / ACCESS CONTROL  
CARD HOLDER, WITH BUILT-IN  
WIRELESS PANIC BUTTON AND  
INDOOR POSITIONING FUNCTION

The Bluetooth ID Badge is perfect for anyone working alone in volatile environments, but also in situations where staff or visitors need to be tracked and located immediately.

- Wearable badge holds any standard ID card / access control card.
- Locate your staff & visitors within any facility via built-in wireless Bluetooth transmitter.
- Discrete Panic Alerting at the push of a button if the situation demands it!

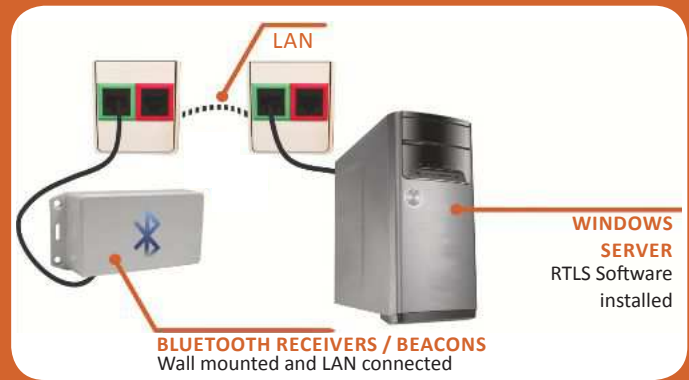

It is ideal for use in:

- Office buildings
- Factories & Warehouses
- Data centers
- Prisons & Psychiatric institutions
- Power utilities facilities

## REAL TIME LOCATION SYSTEM

Via LAN enabled Bluetooth Positioning Beacons/Receivers, the ZONITH Real Time Location System (RTLS) monitors the position and panic alarm of the Bluetooth ID Badge. Knowing the position of a person improves safety and enables rapid response should an incident occur. The RTLS is scalable and will function in small reception areas as well as large production facilities, prisons, etc.

### CLASP

The clasp secures the Bluetooth ID Badge anywhere on your person.

### ID BADGE HOLDER

Any standard ID card will work with the Bluetooth ID Badge. The design of the badge allows the ID card to slide in easily.

### WIRELESS

The badge uses standard wireless Bluetooth communication for positioning and panic alerting, or simply as a positioning device depending on the user scenario.

### PANIC BUTTON

On the back of the Bluetooth Badge you will see the strategically placed panic button. If an emergency arises, one press triggers an alarm through the Bluetooth Receiver network. Long and short press alarms can be triggered.

### POWER BUTTON

Also used to enable and disable the LED.

### HANDLE

Handle for clasp or lanyard when worn horizontally.

### LED

Indicating:

- Normal operation
- Alarm status
- Battery status

### HANDLE

Handle for clasp or lanyard when worn vertically.

## ABOUT ZONITH
